

Coffee Grinder M8

Industry Roasting Plants

Technical Information

The coffee grinder for small and medium sized roasting plants is manufactured in stainless steel. The unique geometry of the grinding discs guarantees a gentle and homogeneous grinding even of Arabian / Turkish quality coffee

The induction motor is reliable. Our long life grinding discs are made of hard casted steel and can be resharpened several times for a long shelflife.

The grinding temperature can be controlled with the integrated thermometer.

The rate of flow will be controlled by a manual valve. The integrated valve magnet will retain metal particles.

TECHNICAL INFO	Coffee Grinder M8
Voltage	380 - 415 V, 50 Hz
Motor Power	3.3 KW
Grinding Capacity	250 – 350 kg/h
Hopper Capacity	50 l
Ø Grinding discs	180 mm
Weight	120 kg
Foot Print W x D	620 x 450 mm
Height	1625 mm
Temperature Control	yes
Overload Protection	integrated
